D2W WORKHORSE

CONTINUOUS MIXING SYSTEM

MIX DUST-FREE...CONTINUOUSLY!

With the SPEC MIX® D2W Workhorse Continuous Mixing System and Dust Collection accessory you can mix material dust-free around the clock. When working indoor and outdoor, floor-to-floor, large projects or small, the D2W Workhorse is the system for high productivity, jobsite flexibility and profitability. This mixer is powered by plugging into a standard 120V circuit giving you the ability to mix SPEC MIX products in close proximity to the work at hand with zero dust. Setting up the system is simple and quick. Before the Workhorse is plugged into a power outlet, hook up a water hose to the inlet—or to pull from a water tank just connect a basic submersible pump and line—then adjust the water for the desired product consistency. Next, start the mixing process by breaking bags of product on the Workhorse's grate to continuously produce quality, consistent material.

The D2W Workhorse features a high speed, effective mixing action that hydrates preblended materials and thoroughly blends the mix for optimal workability and boardlife. The water is metered directly into the system to achieve a constant water-to-cement ratio that ensures superior color uniformity, bond strength and compressive strength. It's the innovative, dustless material delivery system for contractors that mixes a wide range of products and cleans up in a minute or less. The D2W Workhorse is a contractor's solution for locking in quality control and improving daily production!

6917788

BENEFITS

PLUG AND PLAY – RATED FOR A 120V CIRCUIT. SAVES THE COST OF MIXER GASOLINE. SIMPLE OPERATION AND CONTROLS – ONLY NEED TO SET WATER FLOW ONCE. CONTROLS WATER-TO-CEMENT RATIO ELIMINATING STRENGTH AND COLOR CONSISTENCY PROBLEMS. LIGHTWEIGHT AND PORTABLE – WEIGHS 210 LB (95 KG) AND IS EASY TO MOVE AROUND A JOBSITE. EASY DISASSEMBLY FOR CLEANING AND TRANSPORT. RUNS QUIET ENOUGH TO USE IN SENSITIVE AREAS AND ON OFF HOURS

D2W WORKHORSE CONTINUOUS MIXING SYSTEM

The Ultimate Mix Station for Efficiency, Flexibility & Productivity

The design and performance of the D2W Workhorse is the contractor solution for increased profitability. It allows you the opportunity to mix material within feet of your craftsmen—with minimal setup, labor and zero waste—while continuously producing a high quality mix. Weighing 210 pounds (95 kg) the D2W Workhorse moves about a jobsite like a wheelbarrow, can fit on a standard pallet, or can easily be transported in a pickup truck from job to job. It's the portable mixing station designed for an endless list of products and project applications.

SIMPLICITY AND MOBILITY DELIVER EFFICIENCY!

Its light weight construction and compact size allows contractors a new degree of freedom to mix literally wherever the work is taking place.

- **Hi-Rise & Interior Walls:** Masonry is the perfect choice for constructing interior walls—The D2W Workhorse is the perfect system for mixing mortar and grout. As the building goes vertical, the D2W Workhorse easily moves floor-to-floor with your crew.
- **Residential/Multifamily & Site Work:** The mobility of the D2W Workhorse makes it ideal for jobsites with space limitations, rough terrain as well as sprawling projects that put your workforce on the move. With the Workhorse you are no longer tied to a sand pile—it can be quickly relocated wherever needed so your material production area is positioned where the work is being done. With a generator and water source, the Workhorse can go anywhere to maximize productivity!

LARGE CAPACITY HOPPER WITH BAG BREAKER

- Ideal for large projects
- Output - up to 1 pallet / hour (over 1 yd³/ hour)
- Mixes materials w/ 3/8 in or smaller aggregate

OPTIONAL DUST COVER

- Provides Dust-Free operation
- Easy installation
- Simple connection to a standard wet/dry shop vacuum (6 gallon/6hp motor required)

COMPACT & PORTABLE

- Weighs only 210 lbs (95 kg)
- Easy to set up, easy to move

SIMPLE CONTROLS & OPERATION

- Easy to use on/off toggle switch
- Tool-free clamp for ease of assembly and disassembly
- Easy, quick cleanout and low maintenance

WATER FLOW VALVE

- Set and adjust water flow
- Valve and regulator eliminates the need to measure water

DURABLE-DETACHABLE CART

- Ergonomic design for safety & mobility
- Robust construction for jobsite terrain
- Large, solid, maintenance free wheels
- Detaches from mixer for easy transport

LOW POWER REQUIREMENTS

- Plug into standard 120V wall outlet
- No electrician or rewiring needed

SPECIFICATIONS

SIZE

- 67 in x 26.5 in x 42.5 in (170 cm x 67 cm x 108 cm)

OUTPUT (approximate)

- Up to 1 pallet of preblended product / hour (over 1 yd³ / hour)

CAPACITY

- Hopper holds up to 3 (80 lb) bags of preblended product

PRODUCT REQUIREMENTS

- Maximum aggregate size - 5/16 in (8 mm)

* Based on current configuration. Specifications may change slightly due to the model year of manufacture. Confirm specifications with your SPEC MIX representative.

LOW POWER DEMAND, NO NOISE OR EMISSIONS—CONTINUOUS OUTPUT!

Running on standard 120V power, the SPEC MIX D2W Workhorse can literally plug in anywhere and eliminates the cost and inconvenience of powering a mixer with gasoline. Simply plug into a power outlet, connect to a water source, break a few bags of SPEC MIX mortar or grout into the material hopper and flip on the switch to begin making consistently mixed materials. Capable of putting out up to 1.5 cubic yards of mix per hour or as little as a gallon of wet mixed material, this mixer is flexible enough to be used on any size job. What's more, the D2W Workhorse is nearly sound-free making it ideal for noise sensitive projects like hospitals or schools and allows for early/late day use on residential construction sites.

PICK THE MIX—GET CONSISTENCY EVERY TIME!

Whether the specification calls for mortar, core fill grout, stucco, concrete, dry-pack or specialty products using pea gravel, the D2W Workhorse is engineered to thoroughly mix materials to meet specification and tradesmen expectations. The adjustable water control enables contractors to mix a variety of products on-site by simply changing the water supply. Need to feed a stucco or masonry grout pump—The D2W Workhorse is proven to succeed. It's the mixing system that maximizes your jobsite space and manpower to increase your profitability!
